

Eurofoil

Experts in Foil

Eurofoil Aluminium has two world class manufacturing sites, in France and Luxembourg, working together as a homogenous unit exclusively dedicated to the production of aluminium foil. The comprehensive product range offered – in terms of capacity, widths and other technical specifications – brings a dependable answer to a broad range of specification demands.

Through research projects and the exchange of best practices over the years, Eurofoil has learned to develop and manufacture aluminium foil and packaging products best suited to ensure customers' product performance.

Highly independent supply chain with on site continuous casting and recycling
