

HEALTH, SAFETY, QUALITY, ENVIRONMENT AND ENERGY COMMITMENTS 2017/2018

Together we preserve our health and improve our security daily.

We continuously improve our system by managing the risks inherent in our activities.

We ensure the satisfaction of our customers and all our stakeholders and compliance with all regulatory and other requirements that apply to us.

We undertake to prevent any risk of pollution, and to improve our energy performance even in the design and purchase of goods and services

Reinforce our competitiveness

- Optimize the costs of achieving quality
- Understand the expectations and needs of our customers
- Seize the opportunity of new markets

Develop

- Develop EEHS&Q Culture
- Promote partnership with our suppliers and customers
- Promote the training of our employees
- Capitalize on the competencies of our employees

Improve continuously

- Stabilize and improve the quality of the "product / process"
- Manage our supplies according to the economic environment and changes in demand
- Increase our capacity by improving workflow
- Make our management system a comprehensive prevention tool
- Improve energy performance

With this in mind, our staff must proactively support this policy and give priority to the following guidelines :

Our goals for 2017

- In terms of preserving health, safety and the environment :
 - Eliminate, or reduce to an acceptable level, the impact in terms of work accidents, occupational diseases and unhealthy working environments from our processes.
 - Respect and minimize our impact on the environment, including the control of pollutant releases to the air, water and ground; control of noise pollution.
- In terms of quality and customer satisfaction :
 - Exceed customer expectations in terms of the high quality and consistency of our products, shorter delivery times and punctual deliveries.
 - Motivate and engage our personnel in a "quality" approach by close cooperation and partnership based on the exchange of views and ideas.
- Overall EEHS&Q :
 - Perform work as prescribed in our procedures
 - Ensure that all persons having access to the workplace (site staff, stakeholders, visitors, ...) are informed about the risks related to their work and trained in the compliance and enforcement of the rules in both their normal and exceptional activities.
 - Ensure food packaging suppliers of products that are safe and fit for purpose. In order to remain vigilant, the Dudelange site has implemented an HACCP approach and maintains constant communication with staff concerning Good Hygiene Practice.
 - Communicate openly and continuously with other Eurofoil companies, customers and staff, to enable us to continuously improve the quality of our products and services.
 - Conduct regular internal audits in order to:
 - Minimize the likelihood of occurrence of hazards to health and safety at work and to better manage the environmental and quality impacts of such.
 - Remind us to respect and comply with EHS and Quality rules and regulations.
 - Optimize the management of compressed air
 - Reduce the electricity consumption of our plant and equipment.
