

Winter Wishes from Eurofoil

Dear Business Partner,

At this festive time, we would like to take a moment to keep you updated with our news at Eurofoil.

In July this year we celebrated our first anniversary with a decision to expand our casting capacity and increase our foilstock autonomy well beyond 85%. This is a major strategic investment for Eurofoil and represents the biggest investment for the last 10 years. The expansion will help to consolidate our position as a foil market leader in Europe with a highly flexible and strategically secure supply chain. *(Read more at www.eurofoil.com/News)*

We also appointed Ducker Research Europe, an independent research consultancy, to survey our aluminium foil customers in a Customer Satisfaction Survey. There was a record high rate of participation, for which we are very grateful to our customers. While the overall satisfaction has increased to a new high of 87%, there are still quite a number of areas for improvement and suggestions from our customers to optimise. Results have been discussed in detail in the plants and throughout all service departments and action plans are now underway to address these points. You can find more information at www.eurofoil.com/News.

At Eurofoil Paper Coating, this year has been a time for development: A range of new products are now available from our world class converting plant in Berlin. The Paper Coating section of our website has recently been updated to include our capabilities in the confectionery and gift wrap sectors, as can be seen at www.eurofoil.com.

Looking ahead to 2014, Eurofoil is very pleased to be exhibiting at both the Interpack (8th – 14th May 2014) and Aluminium 2014 (7th – 9th October 2014) exhibitions in Düsseldorf next year. We hope you will come and visit our stand to meet the team. We look forward to seeing you there.

We are very committed to our industry and work constantly with partners and associations such as EAFA, FPE and Alupro to promote the sustainable and responsible use of aluminum foil. In January, Willem Loué, our Managing Director will be one of the session chairmen and speakers at the Global Aluminium Foil Roller Conference in Dubai, which will focus, along with other issues, on coordinating actions on sustainability.

Closer to home, Eurofoil is proud to be a sponsor of an intrepid young group of students from the ICN Business School in Nancy, who are taking part in a humanitarian car rally to distribute much needed educational materials to children in remote parts of Morocco. We wish them well on their worthwhile adventure.

On that positive note, we also wish you, your colleagues and your families well during the festive season. Our very best wishes as you embark on your projects and adventures in the New Year.

Yours faithfully,

Visit us at Interpack – May 8-14, 2014

Hall 9 Stand 9F 15

Visit us at Aluminium 2014, October 7-9, 2014

Hall 12 Stand 12H30
