

Eurofoil Innovation Centre in the Spotlight at Interpack

The Eurofoil Innovation Centre, located alongside the Luxembourg National Research Centre “CRP Gabriel Lipmann” with more than 300 R&D staff is the first industrial company to be located at the heart of Luxembourg’s future Science City.

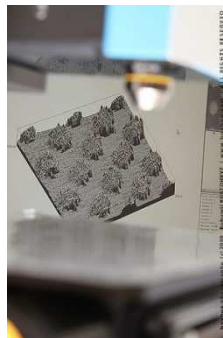

A core team of scientists and technologists fully dedicated to research on foil and its use in laminates and systems is based there and has access to a wide range of highly sophisticated analytical facilities.

Representatives from the team will be on hand at Interpack to talk about their work and research into such fields as surface analysis, metallurgy and processes.

To make individual appointments you can use the Internet On line showroom and click on “contact persons”, using the link below:
